

WP File Download Addon: OneDrive Integration

joomunited.com/wordpress-documentation/wp-file-download/298-wp-file-download-addon-onedrive-integration

Assistance

1. Microsoft OneDrive Application

The OneDrive integration is distributed as a separate Add-on. It includes OneDrive Personal and OneDrive Business. You need to install this add-on (plugin) additionally to WP File Download. The addon includes integration for Google Drive and Dropbox too. These steps below are applied for both.

First, you need a Microsoft Azure App to connect your website to a OneDrive account. Go to: <https://portal.azure.com/>, login and click on **New registration** button.

On Register an application form, setup an app name and copy your website URL into the **Redirect URL** field and click on the **Register** button.

Home > App registrations > Register an application

Register an application

Name
The user-facing display name for this application (this can be changed later).
WP File Download ✓

Supported account types
Who can use this application or access this API?
 Accounts in any organizational directory
 Accounts in any organizational directory and personal Microsoft accounts (e.g. Skype, Xbox, Outlook.com)
[Help me choose...](#)

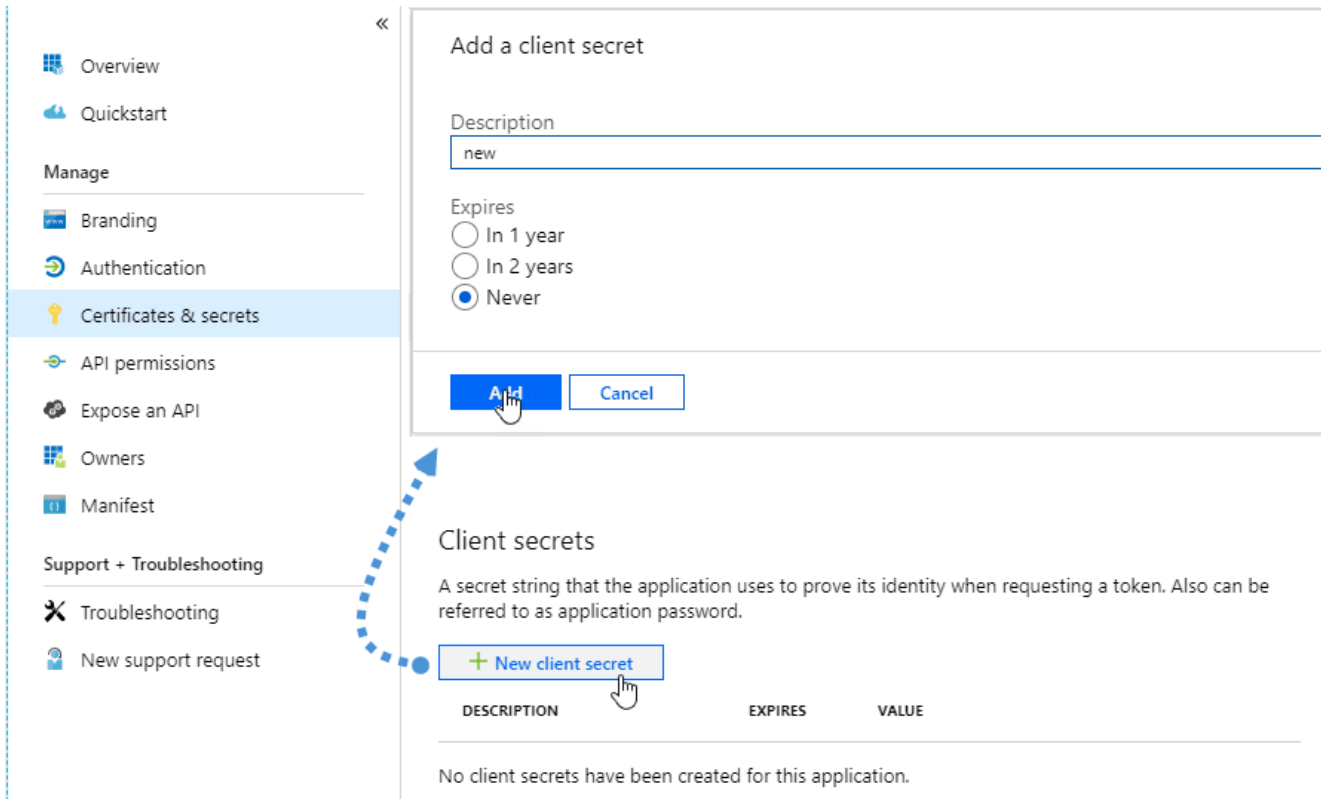

Redirect URI (optional)
We'll return the authentication response to this URI after successfully authenticating the user. Providing this now is optional and it can be changed later, but a value is required for most authentication scenarios.
Web | https://wordpress.ooo/wp-admin/admin.php ✓

By proceeding, you agree to the [Microsoft Platform Policies](#)

Register

Note: The **Redirect URIs Server** should be <https://>.

Then you're almost done, from here you have an **Application ID** (Client ID), only the password is missing. On the left menu, go to **Certificates & secrets**, then click on the **New client secret** button to create one. After that, fill the **Description** and set the **Expires** for it.

A password (Client Secret) is generated right away after pressing on **Add** button, then remember to make a copy.

Client secrets

A secret string that the application uses to prove its identity when requesting a token. Also can be referred to as application password.

[+ New client secret](#)

DESCRIPTION	EXPIRES	VALUE	
new key	12/31/2299	3.]a]C2.y0uuPlufr1b5WJvc5DGHOG2l	<div style="background-color: black; color: white; padding: 2px;">Copy to clipboard</div>

2. Login to OneDrive

Then go back in WordPress admin and click on the menu **WP File Download > Configuration > Cloud Connection tab > Onedrive settings section**. Paste your

- Client ID
- Client Secret

The screenshot shows the 'Client secrets' section of an application configuration page. A table lists a new client secret with the value '3.]a]C2.y0uuPlofr1b5WjvC5DGH0g2l'. A 'Copy to clipboard' button is shown next to the value. Blue dashed arrows indicate the flow of information: one arrow points from the 'Application (client) ID' field (69857f1a-8a7e-4b2a-b4c0-30dae2f5f2e9) to the 'OneDrive Client ID' field, and another arrow points from the copied client secret value to the 'OneDrive Client Secret' field.

DESCRIPTION	EXPIRES	VALUE
new key	12/31/2299	3.]a]C2.y0uuPlofr1b5WjvC5DGH0g2l

After that, save the configuration and then click on the **Connect OneDrive button**.

The screenshot shows the 'OneDrive' configuration page with the 'CONNECT ONEDRIVE' button highlighted by a hand cursor. The 'OneDrive Client ID' field contains the value '69857f1a-8a7e-4b2a-b4c0-30dae2f5f2e9'. Below the field, there is a note: 'Insert your OneDrive Application Id here. You can find this Id in the OneDrive dev center'.

You'll have to validate the access authorization for app access, **just click Yes**.

The connection should be a success 😊
Then you can create files, folders and subfolders in OneDrive and in WP File Download, everything will be synchronized!

WP File Download

Let this app access your info?

unverified

WP File Download needs your permission to:

Access your info anytime

WP File Download will be able to see and update your info, even when you're not using this app.

View your OneDrive photos and documents

WP File Download will be able to see your photos and documents on OneDrive, but can't make changes to them.

Access OneDrive files

WP File Download will be able to open and edit OneDrive files, including files shared with you.

Accepting these permissions means that you allow this app to use your data as specified in their terms of service and privacy statement. **The publisher has not provided links to their terms for you to review.** You can change these permissions at <https://microsoft.com/consent>. [Show details](#)

No

Yes

The image shows a OneDrive interface with a file list and a navigation pane. A blue dashed arrow points from the 'New OneDrive' button in the left sidebar to the 'Sub OneDrive' folder in the navigation pane.
